

Лабораторная работа 10 «Sphinx Документация»

Цель: реализовать развертывание проекта на Sphinx и продемонстрировать это развертывание и его результат в отчете

Ход работы:

1. Для начала создадим директорию нашей документации, в моем случае директория была определена в папке LR10
2. После чего развернем виртуальное окружение командой

```
python -m venv venv
```

```
venv\Scripts\activate # для windows
```

3. После чего Инициализируем Sphinx: **sphinx-quickstart**
4. Следуя инструкциям вводим значения проекта:

```
> Separate source and build directories (y/n) [n]: y

The project name will occur in several places in the built documentation.
> Project name: MyDocumentation
> Author name(s): EugeneShulga
> Project release []: 1.0
```

5. Настройка конфигурации:

```
pip install sphinx sphinx_rtd_theme
```

#устанавливаем тему

```
import sphinx_rtd_theme

extensions = [
    'sphinx.ext.autodoc',
    'sphinx.ext.napoleon',
    'sphinx.ext.viewcode',
]

html_theme = "sphinx_rtd_theme"
html_theme_path = [sphinx_rtd_theme.get_html_theme_path()]
```

6. Для моей документации были определены следующие файлы:

index.rst

```

.. Mafia Game documentation master file, created by
sphinx-quickstart on Sat May 24 2024.

You can adapt this file completely to your liking, but it should at least
contain the root `toctree` directive.

Welcome to Mafia Game's documentation!
